

A case should be...

Environment Policy / Green Policy

Yeong Yang Technology works hard to achieve balanced development in economy, environment and society. We are devoted and dedicated to environmental protection and a safe and healthy workplace for our employees. The Company understand and implement the products from the material selections to the production must be careful to comply with international regulations, directives and customers' requirements to reduce impact on the environment in the life cycle of product.

Green Product and Manufacturing

Yeong Yang is actively engaged in green design of products, 3Rs (Reusing, Recycling, Reducing), waste and pollution reduction, and prevention as guiding principles. Hazardous substances are prohibited in the manufacturing process, and energy saving is incorporated in the design phase.

Green Product Management System and Process

Yeong Yang and supply chain partners have built stable cooperation relationships to conduct RoHS compliance in our green supply management.
